NARRATIVE SUMMARY

GUIDE

MS

ADDICTIONS COUNSELING CERTIFICATE

The following summary is designed to give a brief over-view of the in-depth Compliance Assist report (The full COE report is posted in LiveText) submitted to the Southern Association of Colleges and Schools Commission on Colleges (SACS/COC) for the academic cycle of 2011-2012/ 2012-2013/ 2013-2014. This reported data relates to (SACS/COC) area of 3.3.1 and 3.3.1.1 as stated below:

3.3.1 The institution identifies expected outcomes, assesses the extent to which it achieves these outcomes, and provides evidence of improvement based on analysis of the results in each of the following areas: (Institutional effectiveness)

3.3.1.1 educational programs, to include student learning outcomes (p.27)

The following summary is divided into an overall analysis and a yearly analysis for each of the five SLO's, two measurements per SLO. The format for presentation is that of first the BS degree area, then the ALT-A degree area, traditional MS degree area, and finally the ED S degree area if applicable. There are charts and graphs accompanying each set of data.

Recommendation(s):

Keep present SLO's and supporting assessments in place until the end of 2015-2016 academic year, before the faculty reviews for major changes to the assessment criteria. This is to give the accrediting bodies their final accreditation cycle and written recommendations. From both the internal and external reviews then a systematic and holistic cycle for assessment recommendation can be made and a reasonable time-line can be set for implemented in the 2016-2017 academic year.

0 Out of 0 ADDICTIONS COUNSELING CERTIFICATION in the Exceptional to Average Range

Recommendation(s):

Keep present SLO's and supporting assessments in place until the end of 2015-2016 academic year, before the faculty reviews for major changes to the assessment criteria. This is to give the accrediting bodies their final accreditation cycle and written recommendations. From both the internal and external reviews then a systematic and holistic cycle for assessment recommendation can be made and a reasonable time-line can be set for implemented in the 2016-2017 academic year.

Clinical Mental Health Counseling, MSCP

NARRATIVE SUMMARY

GUIDE

MSCP

CLINICAL MENTAL HEALTH COUNSELING

The following summary is designed to give a brief over-view of the in-depth Compliance Assist report (The full COE report is posted in LiveText) submitted to the Southern Association of Colleges and Schools Commission on Colleges (SACS/COC) for the academic cycle of 2011-2012/ 2012-2013/ 2013-2014. This reported data relates to (SACS/COC) area of 3.3.1 and 3.3.1.1 as stated below:

3.3.1 The institution identifies expected outcomes, assesses the extent to which it achieves these outcomes, and provides evidence of improvement based on analysis of the results in each of the following areas: (Institutional effectiveness)

3.3.1.1 educational programs, to include student learning outcomes (p.27)

The following summary is divided into an overall analysis and a yearly analysis for each of the five SLO's, two measurements per SLO. The format for presentation is that of first the BS degree area, then the ALT-A degree area, traditional MS degree area, and finally the ED S degree area if applicable. There are charts and graphs accompanying each set of data.

0 Number of Counseling Students in the Exceptional to Average Range

Recommendation(s):

Keep present SLO's and supporting assessments in place until the end of 2015-2016 academic year, before the faculty reviews for major changes to the assessment criteria. This is to give the accrediting bodies their final accreditation cycle and written recommendations. From both the internal and external reviews then a systematic and holistic cycle for assessment recommendation can be made and a reasonable time-line can be set for implemented in the 2016-2017 academic year.

COMMUNITY COUNSELING

The following summary is designed to give a brief over-view of the in-depth Compliance Assist report (The full COE report is posted in LiveText) submitted to the Southern Association of Colleges and Schools Commission on Colleges (SACS/COC) for the academic cycle of 2011-2012/ 2012-2013/ 2013-2014. This reported data relates to (SACS/COC) area of 3.3.1 and 3.3.1.1 as stated below:

3.3.1 The institution identifies expected outcomes, assesses the extent to which it achieves these outcomes, and provides evidence of improvement based on analysis of the results in each of the following areas: (Institutional effectiveness)

3.3.1.1 educational programs, to include student learning outcomes (p.27)

The following summary is divided into an overall analysis and a yearly analysis for each of the five SLO's, two measurements per SLO. The format for presentation is that of first the BS degree area, then the ALT-A degree area, traditional MS degree area, and finally the ED S degree area if applicable. There are charts and graphs accompanying each set of data.

- 0 Number of Counseling Students in the Average Range
- 0 Number of Counseling Students in the Below Average Range
- 0 Number of Counseling Students in the No Understanding Range
- 0 Number of Counseling Students in the Exceptional to Average Range

Recommendation(s):

Keep present SLO's and supporting assessments in place until the end of 2015-2016 academic year, before the faculty reviews for major changes to the assessment criteria. This is to give the accrediting bodies their final accreditation cycle and written recommendations. From both the internal and external reviews then a systematic and holistic cycle for assessment recommendation can be made and a reasonable time-line can be set for implemented in the 2016-2017 academic year.

NARRATIVE SUMMARY

GUIDE

MS

SCHOOL COUNSELING

The following summary is designed to give a brief over-view of the in-depth Compliance Assist report (The full COE report is posted in LiveText) submitted to the Southern Association of Colleges and Schools Commission on Colleges (SACS/COC) for the academic cycle of 2011-2012/ 2012-2013/ 2013-2014. This reported data relates to (SACS/COC) area of 3.3.1 and 3.3.1.1 as stated below:

3.3.1 The institution identifies expected outcomes, assesses the extent to which it achieves these outcomes, and provides evidence of improvement based on analysis of the results in each of the following areas: (Institutional effectiveness)
3.3.1.1 educational programs, to include student learning outcomes (p.27)

The following summary is divided into an overall analysis and a yearly analysis for each of the five SLO's, two measurements per SLO. The format for presentation is that of first the BS degree area, then the ALT-A degree area, traditional MS degree area, and finally the ED S degree area if applicable. There are charts and graphs accompanying each set of data.

SCHOOL COUNSELING

The following summary is designed to give a brief over-view of the in-depth Compliance Assist report (The full COE report is posted in LiveText) submitted to the Southern Association of Colleges and Schools Commission on Colleges (SACS/COC) for the academic cycle of 2011-2012/ 2012-2013/ 2013-2014. This reported data relates to (SACS/COC) area of 3.3.1 and 3.3.1.1 as stated below:

3.3.1 The institution identifies expected outcomes, assesses the extent to which it achieves these outcomes, and provides evidence of improvement based on analysis of the results in each of the following areas: (Institutional effectiveness)

3.3.1.1 educational programs, to include student learning outcomes (p.27)

The following summary is divided into an overall analysis and a yearly analysis for each of the five SLO's, two measurements per SLO. The format for presentation is that of first the BS degree area, then the ALT-A degree area, traditional MS degree area, and finally the ED S degree area if applicable. There are charts and graphs accompanying each set of data.

0 Number of Counseling Students in the Mastery Range

0 Number of Counseling Students in the Average Range

0 Number of Counseling Students in the Below Average Range

0 Number of Counseling Students in the No Understanding Range

0 Number of Counseling Students in the Exceptional to Average Range

Recommendation(s):

Keep present SLO's and supporting assessments in place until the end of 2015-2016 academic year, before the faculty reviews for major changes to the assessment criteria. This is to give the accrediting bodies their final accreditation cycle and written recommendations. From both the internal and external reviews then a systematic and holistic cycle for assessment recommendation can be made and a reasonable time-line can be set for implemented in the 2016-2017 academic year.

Student Affairs Counseling, MSCP

NARRATIVE SUMMARY

GUIDE

MSCP

STUDENT AFFAIRS COUNSELING

The following summary is designed to give a brief over-view of the in-depth Compliance Assist report (The full COE report is posted in LiveText) submitted to the Southern Association of Colleges and Schools Commission on Colleges (SACS/COC) for the academic cycle of 2011-2012/ 2012-2013/ 2013-2014. This reported data relates to (SACS/COC) area of 3.3.1 and 3.3.1.1 as stated below:

3.3.1 The institution identifies expected outcomes, assesses the extent to which it achieves these outcomes, and provides evidence of improvement based on analysis of the results in each of the following areas: (Institutional effectiveness)
3.3.1.1 educational programs, to include student learning outcomes (p.27)

The following summary is divided into an overall analysis and a yearly analysis for each of the five SLO's, two measurements per SLO. The format for presentation is that of first the BS degree area, then the ALT-A degree area, traditional MS degree area, and finally the ED S degree area if applicable. There are charts and graphs accompanying each set of data.

Substance Abuse Counseling, MSCP

NARRATIVE SUMMARY

GUIDE

MSCP

SUBSTANCE ABUSE COUNSELING

The following summary is designed to give a brief over-view of the in-depth Compliance Assist report (The full COE report is posted in LiveText) submitted to the Southern Association of Colleges and Schools Commission on Colleges (SACS/COC) for the academic cycle of 2011-2012/ 2012-2013/ 2013-2014. This reported data relates to (SACS/COC) area of 3.3.1 and 3.3.1.1 as stated below:

3.3.1 The institution identifies expected outcomes, assesses the extent to which it achieves these outcomes, and provides evidence of improvement based on analysis of the results in each of the following areas: (Institutional effectiveness)
3.3.1.1 educational programs, to include student learning outcomes (p.27)

The following summary is divided into an overall analysis and a yearly analysis for each of the five SLO's, two measurements per SLO. The format for presentation is that of first the BS degree area, then the ALT-A degree area, traditional MS degree area, and finally the ED S degree area if applicable. There are charts and graphs accompanying each set of data.

2011-2012 the results of the assessment for TROY overall cannot be recorded, the data will be collected beginning in 2012-2013 with the activation of the program.

Narrative

Year-by-Year Analysis:

Overall Analysis:

526 Total Number of Completers
 258 (48%) Number of Counseling Students in the Exceptional Range
 196 (37%) Number of Counseling Students in the Mastery Range
 62 (9%) Number of Counseling Students in the Average Range
 27 (4%) Number of Counseling Students in the Below Average Range
 10 (2%) Number of Counseling Students in the No Understanding Range
 516 Out of 526 (94%) Number of Counseling Students in the Exceptional to Average Range

Year: 2013-2014

223 Total Number of Completers
 89 (40%) Number of Counseling Students in the Exceptional Range
 93 (42%) Number of Counseling Students in the Mastery Range
 31 (13%) Number of Counseling Students in the Average Range
 9 (4%) Number of Counseling Students in the Below Average Range
 1 (1%) Number of Counseling Students in the No Understanding Range
 213 Out of 223 (95%) Number of Counseling Students in the Exceptional to Average Range

Year: 2012-2013

330 Total Number of Completers

169 (51%) Number of Counseling Students in the Exceptional Range

103 (31%) Number of Counseling Students in the Mastery Range

31 (9%) Number of Counseling Students in the Average Range

18 (6%) Number of Counseling Students in the Below Average Range

9 (3%) Number of Counseling Students in the No Understanding Range

303 Out of 330 (91%) Number of Counseling Students in the Exceptional to Average Range

Year: 2011-2012

0 Total Number of Completers

0 Number of Counseling Students in the Exceptional Range

0 Number of Counseling Students in the Mastery Range

0 Number of Counseling Students in the Average Range

0 Number of Counseling Students in the Below Average Range

0 Number of Counseling Students in the No Understanding Range

0 Number of Counseling Students in the Exceptional to Average Range

Recommendation(s):

Keep present SLO's and supporting assessments in place until the end of 2015-2016 academic year, before the faculty reviews for major changes to the assessment criteria. This is to give the accrediting bodies their final accreditation cycle and written recommendations. From both the internal and external reviews then a systematic and holistic cycle for assessment recommendation can be made and a reasonable time-line can be set for implemented in the 2016-2017 academic year.

DIVISION OF EDUCATION

Adult Education, MS

NARRATIVE SUMMARY

GUIDE

MS

ADULT EDUCATION

The following summary is designed to give a brief over-view of the in-depth Compliance Assist report (The full COE report is posted in LiveText) submitted to the Southern Association of Colleges and Schools Commission on Colleges (SACS/COC) for the academic cycle of 2011-2012/ 2012-2013/ 2013-2014. This reported data relates to (SACS/COC) area of 3.3.1 and 3.3.1.1 as stated below:

3.3.1 The institution identifies expected outcomes, assesses the extent to which it achieves these outcomes, and provides evidence of improvement based on analysis of the results in each of the following areas: (Institutional effectiveness)
3.3.1.1 educational programs, to include student learning outcomes (p.27)

The following summary is divided into an overall analysis and a yearly analysis for each of the five SLO's, two measurements per SLO. The format for presentation is that of first the BS degree area, then the ALT-A degree area, traditional MS degree area, and finally the ED S degree area if applicable. There are charts and graphs accompanying each set of data.

Recommendation(s):

Problem(s) or weakness (es) identified in your assessment:

1. After a review of our assessment protocol, it was discovered that the student's assessment of the problem has not been captured.

2. SLO #4: DIVERSITY only has one assessment. Addressing diversity is being done in the program but the design for capturing and documenting this SLO is weak and needs to be addressed by the faculty and curriculum committee

Action Plan: What are you going to do?

1. Implement an exit survey to assess the programs quality in relationship to the students' perspective.

2. SLO #4: DIVERSITY only has one assessment. Addressing diversity is being done in the program but the design for capturing and documenting this SLO is weak and needs to be addressed by the faculty and curriculum committee

Action Plan: How are you going to correct the problem (?)

1. A survey is being designed and will be added to the ADE 6699 course as a non-graded assignment. Students take ADE 6699 in their second to last term or final term in the program.

2. SLO #4: DIVERSITY only has one assessment. Addressing diversity is being done in the program but the design for capturing and documenting this SLO is weak and needs to be addressed by the faculty and curriculum committee

Action Plan: How are you going to re-assess it?

Review survey data and DIVERSITY after one AY cycle.

Action Plan: When will the action plan be completed?

Collaborative Teacher (6-12), B.S.

NARRATIVE SUMMARY

GUIDE

B.S., ALT-A, and Traditional MS

COLLABORATIVE TEACHER (6-12)

The following summary is designed to give a brief over-view of the in-depth Compliance Assist report (The full COE report is posted in LiveText) submitted to the Southern Association of Colleges and Schools Commission on Colleges (SACS/COC) for the academic cycle of 2011-2012/ 2012-2013/ 2013-2014. This reported data relates to (SACS/COC) area of 3.3.1 and 3.3.1.1 as stated below:

3.3.1 The institution identifies expected outcomes, assesses the extent to which it achieves these outcomes, and provides evidence of improvement based on analysis of the results in each of the following areas: (Institutional effectiveness)
3.3.1.1 educational programs, to include student learning outcomes (p.27)

The following summary is divided into an overall analysis and a yearly analysis for each of the five SLO's, two measurements per SLO. The format for presentation is that of first the BS degree area, then the ALT-A degree area, traditional MS degree area, and finally the ED S degree area if applicable. There are charts and graphs accompanying each set of data.

PRAXIS
Three Year Data Cycle
SLO #1 Content Knowledge

Narrative

Year-by-Year Analysis:

Year: 2013-2014

20 Total Number taking Special Education: Core Knowledge PRAXIS
20 or 100% Number passing Special Education: Core Knowledge PRAXIS
Failing Number not reported Special Education: Core Knowledge PRAXIS

Year: 2012-2013

29 Total Number taking Special Education: Core Knowledge PRAXIS
27 or 93% Number and percent passing Special Education: Core Knowledge PRAXIS
2 or 3% Number and percent failing Special Education: Core Knowledge PRAXIS

Year: 2011-2012

8 Total Number taking Special Education: Core Knowledge PRAXIS
8 or 100% Number and percent passing Special Education: Core Knowledge PRAXIS
0 or 0% Number and percent failing Special Education: Core Knowledge PRAXIS

Overall Analysis:

54 Total Number taking Special Education: Core Knowledge PRAXIS
52 or 96% Number and percent passing Special Education: Core Knowledge PRAXIS
2 or 4% Number and percent failing Special Education: Core Knowledge PRAXIS

Recommendation(s):

At this time in the assessment cycle the recommendation is to keep PRAXIS as one of the measurements for *SLO #1: Content Knowledge: Student will demonstrate their knowledge, skills, and competencies in the content area of their degree program*. The use of the PRAXIS scores gives a “High Stakes” testing view of our candidates’ content knowledge.

All degree programs in the Division of Education are beginning an intense curriculum review and revision with major changes in structure and key assessments to meet the new Alabama State Department of Education and CAEP standards. These changes will be reflected in the future SLO’s and Key Assignments all designed to strengthen candidates’ ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

0 (0%) Number of Education Students in the Beginning Range

179 Out of 179 (100%) Total Number of Education Students in the Exemplary to Proficient Range

Recommendation(s):

At this time in the assessment cycle the recommendation is to keep SED 4474 Portfolio Area #2 as one of the measurements for *SLO #1: Content Knowledge: Student will demonstrate their knowledge, skills, and competencies in the content area of their degree program.* The over-all student performance is strong in the Exemplary to Proficient Range.

All degree programs in the Division of Education are beginning an intense curriculum review and revision with major changes in structure and key assessments to meet the new Alabama State Department of Education and CAEP standards. These changes will be reflected in the future SLO's and Key Assignments all designed to strengthen candidates' ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

Recommendation(s):

All degree programs in the Division of Education are beginning an intense curriculum review and revision with major changes in structure and key assessments to meet the new Alabama State Department of Education and CAEP standards. These changes will be reflected in the future SLO's and Key Assignments all designed to strengthen candidates' ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

Recommendation(s):

All degree programs in the Division of Education are beginning an intense curriculum review and revision with major changes in structure and key assessments to meet the new Alabama State Department of Education and CAEP standards. These changes will be reflected in the future SLO's and Key Assignments all designed to strengthen candidates' ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

Collaborative Teacher (K-6), B.S.

NARRATIVE SUMMARY

GUIDE

B.S., ALT-A, and Traditional MS

COLLABORATIVE TEACHER (K-6)

The following summary is designed to give a brief over-view of the in-depth Compliance Assist report (The full COE report is posted in LiveText) submitted to the Southern Association of Colleges and Schools Commission on Colleges (SACS/COC) for the academic cycle of 2011-2012/ 2012-2013/ 2013-2014. This reported data relates to (SACS/COC) area of 3.3.1 and 3.3.1.1 as stated below:

3.3.1 The institution identifies expected outcomes, assesses the extent to which it achieves these outcomes, and provides evidence of improvement based on analysis of the results in each of the following areas: (Institutional effectiveness)
3.3.1.1 educational programs, to include student learning outcomes (p.27)

The following summary is divided into an overall analysis and a yearly analysis for each of the five SLO's, two measurements per SLO. The format for presentation is that of first the BS degree area, then the ALT-A degree area, traditional MS degree area, and finally the ED S degree area if applicable. There are charts and graphs accompanying each set of data.

52 or 96% Number and percent passing Special Education: Core Knowledge PRAXIS

2 or 4% Number and percent failing Special Education: Core Knowledge PRAXIS

Recommendation(s):

At this time in the assessment cycle the recommendation is to keep PRAXIS as one of the measurements for *SLO #1: Content Knowledge: Student will demonstrate their knowledge, skills, and competencies in the content area of their degree program*. The use of the PRAXIS scores gives a “High Stakes” testing view of our candidates’ content knowledge.

All degree programs in the Division of Education are beginning an intense curriculum review and revision with major changes in structure and key assessments to meet the new Alabama State Department of Education and CAEP standards. These changes will be reflected in the future SLO’s and Key Assignments all designed to strengthen candidates’ ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

Recommendation(s):

All degree programs in the Division of Education are beginning an intense curriculum review and revision with major changes in structure and key assessments to meet the new Alabama State Department of Education and CAEP standards. These changes will be reflected in the future SLO's and Key Assignments all designed to strengthen candidates' ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

Recommendation(s):

All degree programs in the Division of Education are beginning an intense curriculum review and revision with major changes in structure and key assessments to meet the new Alabama State Department of Education and CAEP standards. These changes will be reflected in the future SLO's and Key Assignments all designed to strengthen candidates' ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

Early Childhood Education (P-3), B.S.

NARRATIVE SUMMARY

GUIDE

B.S., ALT-A, Traditional MS, and EdS

EARLY CHILDHOOD EDUCATION (P-3)

The following summary is designed to give a brief over-view of the in-depth Compliance Assist report (The full COE report is posted in LiveText) submitted to the Southern Association of Colleges and Schools Commission on Colleges (SACS/COC) for the academic cycle of 2011-2012/ 2012-2013/ 2013-2014. This reported data relates to (SACS/COC) area of 3.3.1 and 3.3.1.1 as stated below:

3.3.1 The institution identifies expected outcomes, assesses the extent to which it achieves these outcomes, and provides evidence of improvement based on analysis of the results in each of the following areas: (Institutional effectiveness)

3.3.1.1 educational programs, to include student learning outcomes (p.27)

The following summary is divided into an overall analysis and a yearly analysis for each of the five SLO's, two measurements per SLO. The format for presentation is that of first the BS degree area, then the ALT-A degree area, traditional MS degree area, and finally the ED S degree area if applicable. There are charts and graphs accompanying each set of data.

Recommendation(s):

All degree programs in the Division of Education are beginning an intense curriculum review and revision with major changes in structure and key assessments to meet the new Alabama State Department of Education and CAEP standards. These changes will be reflected in the future SLO's and Key Assignments all designed to strengthen candidates' ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

Recommendation(s):

All degree programs in the Division of Education are beginning an intense curriculum review and revision with major changes in structure and key assessments to meet the new Alabama State Department of Education and CAEP standards. These changes will be reflected in the future SLO's and Key Assignments all designed to strengthen candidates' ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

These changes will be reflected in the future SLO's and Key Assignments all designed to strengthen candidates' ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

NARRATIVE SUMMARY

GUIDE

MS

EDUCATIONAL ADMINISTRATION AND LEADERSHIP

The following summary is designed to give a brief over-view of the in-depth Compliance Assist report (The full COE report is posted in LiveText) submitted to the Southern Association of Colleges and Schools Commission on Colleges (SACS/COC) for the academic cycle of 2011-2012/ 2012-2013/ 2013-2014. This reported data relates to (SACS/COC) area of 3.3.1 and 3.3.1.1 as stated below:

3.3.1 The institution identifies expected outcomes, assesses the extent to which it achieves these outcomes, and provides evidence of improvement based on analysis of the results in each of the following areas: (Institutional effectiveness)

3.3.1.1 educational programs, to include student learning outcomes (p.27)

The following summary is divided into an overall analysis and a yearly analysis for each of the five SLO's, two measurements per SLO. The format for presentation is that of first the BS degree area, then the ALT-A degree area, traditional MS degree area, and finally the ED S degree area if applicable. There are charts and graphs accompanying each set of data.

Recommendation(s):

All degree programs in the Division of Education are beginning an intense curriculum review and revision with major changes in structure and key assessments to meet the new Alabama State Department of Education and CAEP standards. These changes will be reflected in the future SLO's and Key Assignments all designed to strengthen candidates' ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

Recommendation(s):

All degree programs in the Division of Education are beginning an intense curriculum review and revision with major changes in structure and key assessments to meet the new Alabama State Department of Education and CAEP standards. These changes will be reflected in the future SLO's and Key Assignments all designed to strengthen candidates' ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

Recommendation(s):

All degree programs in the Division of Education are beginning an intense curriculum review and revision with major changes in structure and key assessments to meet the new Alabama State Department of Education and CAEP standards. These changes will be reflected in the future SLO's and Key Assignments all designed to strengthen candidates' ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

Recommendation(s):

All degree programs in the Division of Education are beginning an intense curriculum review and revision with major changes in structure and key assessments to meet the new Alabama State Department of Education and CAEP standards. These changes will be reflected in the future SLO's and Key Assignments all designed to strengthen candidates' ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

NARRATIVE SUMMARY

GUIDE

MS

INSTRUCTIONAL LEADERSHIP AND ADMINISTRATION

The following summary is designed to give a brief over-view of the in-depth Compliance Assist report (The full COE report is posted in LiveText) submitted to the Southern Association of Colleges and Schools Commission on Colleges (SACS/COC) for the academic cycle of 2011-2012/ 2012-2013/ 2013-2014. This reported data relates to (SACS/COC) area of 3.3.1 and 3.3.1.1 as stated below:

3.3.1 The institution identifies expected outcomes, assesses the extent to which it achieves these outcomes, and provides evidence of improvement based on analysis of the results in each of the following areas: (Institutional effectiveness)

3.3.1.1 educational programs, to include student learning outcomes (p.27)

The following summary is divided into an overall analysis and a yearly analysis for each of the five SLO's, two measurements per SLO. The format for presentation is that of first the BS degree area, then the ALT-A degree area, traditional MS degree area, and finally the ED S degree area if applicable. There are charts and graphs accompanying each set of data.

Recommendation(s):

All degree programs in the Division of Education are beginning an intense curriculum review and revision with major changes in structure and key assessments to meet the new Alabama State Department of Education and CAEP standards. These changes will be reflected in the future SLO's and Key Assignments all designed to strengthen candidates' ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

NARRATIVE SUMMARY

GUIDE

ED S

INSTRUCTIONAL LEADERSHIP AND ADMINISTRATION

The following summary is designed to give a brief over-view of the in-depth Compliance Assist report (The full COE report is posted in LiveText) submitted to the Southern Association of Colleges and Schools Commission on Colleges (SACS/COC) for the academic cycle of 2011-2012/ 2012-2013/ 2013-2014. This reported data relates to (SACS/COC) area of 3.3.1 and 3.3.1.1 as stated below:

3.3.1 The institution identifies expected outcomes, assesses the extent to which it achieves these outcomes, and provides evidence of improvement based on analysis of the results in each of the following areas: (Institutional effectiveness)

3.3.1.1 educational programs, to include student learning outcomes (p.27)

The following summary is divided into an overall analysis and a yearly analysis for each of the five SLO's, two measurements per SLO. The format for presentation is that of first the BS degree area, then the ALT-A degree area, traditional MS degree area, and finally the ED S degree area if applicable. There are charts and graphs accompanying each set of data.

Recommendation(s):

All degree programs in the Division of Education are beginning an intense curriculum review and revision with major changes in structure and key assessments to meet the new Alabama State Department of Education and CAEP standards. These changes will be reflected in the future SLO's and Key Assignments all designed to strengthen candidates' ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

Recommendation(s):

All degree programs in the Division of Education are beginning an intense curriculum review and revision with major changes in structure and key assessments to meet the new Alabama State Department of Education and CAEP standards. These changes will be reflected in the future SLO's and Key Assignments all designed to strengthen candidates' ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

Recommendation(s):

All degree programs in the Division of Education are beginning an intense curriculum review and revision with major changes in structure and key assessments to meet the new Alabama State Department of Education and CAEP standards. These changes will be reflected in the future SLO's and Key Assignments all designed to strengthen candidates' ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

No Data Available

NARRATIVE SUMMARY

GUIDE

MS

POST-SECONDARY EDUCATION

The following summary is designed to give a brief over-view of the in-depth Compliance Assist report (The full COE report is posted in LiveText) submitted to the Southern Association of Colleges and Schools Commission on Colleges (SACS/COC) for the academic cycle of 2011-2012/ 2012-2013/ 2013-2014. This reported data relates to (SACS/COC) area of 3.3.1 and 3.3.1.1 as stated below:

3.3.1 The institution identifies expected outcomes, assesses the extent to which it achieves these outcomes, and provides evidence of improvement based on analysis of the results in each of the following areas: (Institutional effectiveness)

3.3.1.1 educational programs, to include student learning outcomes (p.27)

The following summary is divided into an overall analysis and a yearly analysis for each of the five SLO's, two measurements per SLO. The format for presentation is that of first the BS degree area, then the ALT-A degree area, traditional MS degree area, and finally the ED S degree area if applicable. There are charts and graphs accompanying each set of data.

Recommendation(s):

All degree programs in the Division of Education are beginning an intense curriculum review and revision with major changes in structure and key assessments to meet the new Alabama State Department of Education and CAEP standards. These changes will be reflected in the future SLO's and Key Assignments all designed to strengthen candidates' ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

Year: 2011-2012

EDU 4471 Personal Teaching Philosophy Area 1 SLO 5

318 Total Number of Completers

85 (28%) Education students in the Exceptional range

185 (58%) Education students in the Proficient range

38 (12%) Education students in the Basic range

10 (2%) Education students in the Unacceptable range

270 Out of 318 (85%) Education students in the Exceptional to Basic range

Recommendation(s):

All degree programs in the Division of Education are beginning an intense curriculum review and revision with major changes in structure and key assessments to meet the new Alabama State Department of Education and CAEP standards. These changes will be reflected in the future SLO's and Key Assignments all designed to strengthen candidates' ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

Recommendation(s):

All degree programs in the Division of Education are beginning an intense curriculum review and revision with major changes in structure and key assessments to meet the new Alabama State Department of Education and CAEP standards. These changes will be reflected in the future SLO's and Key Assignments all designed to strengthen candidates' ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

Recommendation(s):

All degree programs in the Division of Education are beginning an intense curriculum review and revision with major changes in structure and key assessments to meet the new Alabama State Department of Education and CAEP standards. These changes will be reflected in the future SLO's and Key Assignments all designed to strengthen candidates' ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

NARRATIVE SUMMARY

GUIDE

ED S

TEACHER LEADER

The following summary is designed to give a brief over-view of the in-depth Compliance Assist report (The full COE report is posted in LiveText) submitted to the Southern Association of Colleges and Schools Commission on Colleges (SACS/COC) for the academic cycle of 2011-2012/ 2012-2013/ 2013-2014. This reported data relates to (SACS/COC) area of 3.3.1 and 3.3.1.1 as stated below:

3.3.1 The institution identifies expected outcomes, assesses the extent to which it achieves these outcomes, and provides evidence of improvement based on analysis of the results in each of the following areas: (Institutional effectiveness)
3.3.1.1 educational programs, to include student learning outcomes (p.27)

The following summary is divided into an overall analysis and a yearly analysis for each of the five SLO's, two measurements per SLO. The format for presentation is that of first the BS degree area, then the ALT-A degree area, traditional MS degree area, and finally the ED S degree area if applicable. There are charts and graphs accompanying each set of data.

Measurement: TL 7737 CURRICULUM ALIGNMENT RUBRIC AREA#1

0 Total Number of Completers

0 Number of Education Students in the Exceptional Range

0 Number of Education Students in the Proficient Range

0 Number of Education Students in the Basic Range

0 Number of Education Students in the Unacceptable Range

0 Out of 0 Teacher Leader Ed S in the Exceptional to Basic Range

Recommendation(s):

All degree programs in the Division of Education are beginning an intense curriculum review and revision with major changes in structure and key assessments to meet the new Alabama State Department of Education and CAEP standards. These changes will be reflected in the future SLO's and Key Assignments all designed to strengthen candidates' ability to improve P-12 student learning.

The recommendation at this time is to maintain the current assessments until the new guidelines and standards are in place. This will facilitate the transition to the new format in one cycle instead of small piece meal steps which have the possibility of being incorrect. Work is under way to have new course designs, new key assessments, and new state check list in place and approved by the Alabama Department of Education in the summer of 2015. The projected new cycle will be in the academic year of 2015-2016.

NARRATIVE SUMMARY

GUIDE

B.S.

PSYCHOLOGY

The following summary is designed to give a brief over-view of the in-depth Compliance Assist report (The full COE report is posted in LiveText) submitted to the Southern Association of Colleges and Schools Commission on Colleges (SACS/COC) for the academic cycle of 2011-2012/ 2012-2013/ 2013-2014. This reported data relates to (SACS/COC) area of 3.3.1 and 3.3.1.1 as stated below:

3.3.1 The institution identifies expected outcomes, assesses the extent to which it achieves these outcomes, and provides evidence of improvement based on analysis of the results in each of the following areas: (Institutional effectiveness)
3.3.1.1 educational programs, to include student learning outcomes (p.27)

The following summary is divided into an overall analysis and a yearly analysis for each of the five SLO's, two measurements per SLO. The format for presentation is that of first the BS degree area, then the ALT-A degree area, traditional MS degree area, and finally the ED S degree area if applicable. There are charts and graphs accompanying each set of data.

(No Data)

Recommendation(s):

The Division of Psychology with-in the College of Education is in the process of revising their SLO's and selecting targeted assessments to measure their SLO's. At this time, they are working with one measurement for each SLO. In the 2015-2016 Academic Year Cycle, they will be reviewing and revising the number of measurements to give a more robust view of their students' learning and achievements.

Undergraduate PSYCHOLOGY:
 PSY 3301 Basic Statistics Exam
